

Do you have a Spa or Pool Heater?

Hayward ♠ Pentair ♣ Raypak ♥ Reem ♦ Sta-Rite

Have you had your gas heater inspected lately? Did you know you should have it inspected at least once a year!

Pool Kings Annual Heater Maintenance

Manufacturers recommend servicing your gas heater on a regular basis

The following inspection procedures are recommended to be performed as part of annual & semi annual heater maintenance to assure safe operation of your Hayward, Pentair, Raypak, Reem or Sta-Rite, or other manufacturer . Each manufacturer has different maintenance procedures, so please let us know which gas heater you have when you make your appointment.

Only industry certified service technicians, having appropriate test equipment, should be allowed to service any heater.

Pool Kings Annual 10 Point Complete Residential Heater Service

1. Complete full visual inspection of the pilot and main burners.
2. Clear pilot assembly and burners of any obstruction.
3. Check flow of gas valve
4. Check heat exchanger for soot / corrosion, broken or bent fins, leakage or clogging from soot.
5. Vacuum / dust out the bottom of heater to remove dust and debris.
6. Remove any leaves or debris from around the outside of the heater.
7. Check for broken or damaged pipes.
8. An overall inspection of components, safety devices and operation of switches and thermostat control.
9. Check exhaust pipe for any leakage.
10. Report any findings (unsafe items, problems or concerns) to the customer.

Approx time 1 hour / \$149.50

If soot has accumulated on the heat exchanger tubes it must be removed and the cause must be corrected. Pool Kings charges extra for this procedure.

DANGER! It is very important to clean the soot from the heat exchanger! Soot on a heat exchanger may be ignited by a random spark or open flame!

Only a qualified Technician / Company should perform this work. Pool Kings Technicians are qualified and certified to perform all work on your heater.
